

CLIMATE CHANGE: UNRAVELLING THE COMPLEXITIES OF COP21

The United Nations' 2015 Paris Climate Conference (COP21) was a catalyst for significant climate change strategy and policy development for many nations including Canada and in particular Ontario.

Prior to COP21, The Ontario Government published its vision for achieving significant reductions in GHG emissions over the next 35 years; followed by a round of stakeholder consultation on Cap & Trade Program Design Options. With further consultations on regulations and design expected in 2016 and a program launch date prospectively set for 2017, many questions remain unanswered.

Join us as our speakers unravel the complexities of COP21, the global initiatives being implemented and what this means for Ontario and its proposed Cap & Trade program.

Date: Thursday, February 18
Time: 7:30 am - 9:30 am

Location: One King West Hotel
Grand Banking Hall
1 King Street West
Toronto, ON

Online Registration:
<http://oegaspeakerseries2016.eventbrite.ca>

Tickets:
Members \$90
Non-members \$110
Table of 8 (Members) \$690
Table of 8 (Non-members) \$790

Agenda:
7:30 am Registration Opens
8:00 am Presentations
9:00 am Audience Q&A
9:30 am Event Concludes

Featuring:

Lisa DeMarco
Partner, Demarco Allan LLP

Lisa participated extensively in the Paris negotiations. We'll hear from her what happened at COP21; who the key players were, what strategies they will be implementing, and what COP21 means overall on a global basis.

Duncan Rotherham
Vice President, ICF International

Duncan will examine Ontario and its developing Cap & Trade program; what are the design challenges and policy considerations that need to be addressed over the coming months, what are the impacts to the electricity and gas distribution sector, where does the customer stand, and what should we be doing to maximize the opportunities from Cap & Trade.
